Microlearning Courses
Health, Safety & Environment Training

Our best-in-class microlearning courses deliver just-in-time training designed to help you achieve better business outcomes and safeguard lives, when and where you need it. Vector Solutions' microlearning courses are derived from our industry-leading Health, Safety and Environment Premium Library, and were developed to *supplement and enhance* your training with courses averaging five minutes in length. Our courses are strategically designed to be utilized as in-the-moment refresher training, and to increase workers' knowledge and skill retention through easily digestible, micro-sized content modules and animated simulations.

Why Vector Solutions?

- Courses derived from award-winning HSE premium course content
- Mix of powerful & engaging 3D animations & live action footage
- Courses available in 40+ languages
- State-of-the-art course player designed to streamline course launch, limit buffering & adapt course content to all mobile devices

- Advanced interactive question types designed to increase retention
- Interactive transcripts for immediate access to on-the-job training & application
- Timely regulatory updates
