

# EHS Management Software

Our configurable environmental, health and safety (EHS) management software suite empowers organizations to efficiently record, track and trend safety data; ensure regulatory compliance; reduce risks; and save time and costs.

## Record, Track, and Analyze the Following Safety Activities

- Incidents and Claims
- OSHA Recordkeeping
- Safety Metrics & Dashboards
- Inspections
- Training
- Behavior Based Safety Observations
- Job Safety Analysis
- Corrective Actions
- Hazards
- Safety Data Sheets

## Automate Notifications and Improve Safety with Real-Time Insights

Automatic email alerts and scheduled reports notify company employees and EHS team members of safety activities and follow up actions. EHS managers and leadership can receive detailed reports and view safety performance metrics across their organization.

## We Make You Safer, Smarter, Better

At Vector Solutions, we believe that how we serve our clients enables and empowers them to in turn serve others, making us greater than the sum of our parts.

Vector EHS Management easily interfaces with Vector Solutions Learning Management Software and Vector Solutions' multiple course libraries including premium health and safety topics.

Protect and empower your employees with EHS and training solutions designed to make them safer, more capable, and compliant.
